

## MOVE

# Mobile Visualization Environment

**Mechdyne's MOVE (Mobile Visualization Environment) is a Portable Projection Virtual Reality (VR) System which provides a cost-effective way to turn any environment into a virtual world.**

This Portable Projection VR System has made virtual reality (VR) more accessible, enabling users to easily set up and utilize projection systems in various environments.

### Portable

The portability of portable projection VR systems is one of their most appealing aspects. Mechdyne has designed these systems to be lightweight and easy to transport, enabling users to set them up quickly in various environments.

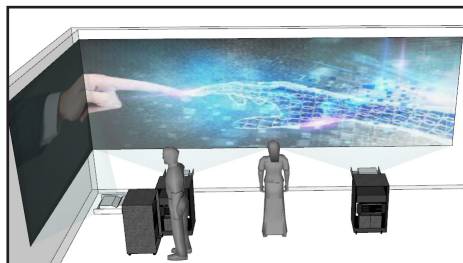

### System Specifications:

- 5,000 lumens
- Christie® projector
- Portable
- 12 VR glasses included
- 1800:1 Full on/off contrast ratio
- WUXGA (1920 x 1200) Resolution
- Solid-state laser Illumination type
- 20,000 hours Illumination performance hours

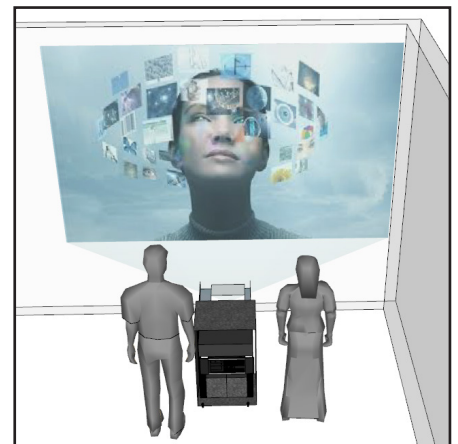

### Scalable

Mechdyne's Projection VR systems can stretch the visual experience across large surfaces, transforming any room into an expansive virtual landscape. Each system can project up to a 150" diagonal, utilizing multiple systems can create a large virtual reality solution.

### 2D and 3D Capable

System can be utilized as 2D or 3D virtual reality.
