

# EXPERIENCE WRIGHT BROTHERS

## VIRTUAL REALITY TOUR

*Experience Wright Brothers* immerses you in a detailed virtual recreation of the Wright Cycle Company bicycle shop as it appeared in Dayton, Ohio in 1886. Now preserved as a museum and designated a U.S. National Historic Landmark, this iconic space comes alive as an interactive virtual field trip. Explore the shop hands-on by picking up and examining richly detailed letters, tools, and early inventions created by the Wright brothers. Then take innovation to the skies with a first-person flight simulator, controlling an accurate 3D model of the legendary Wright Flyer and reliving the birth of powered flight.

This VR application has been designed with the Unity game engine for use with Mechdyne's getReal 3D platform for Powerwall, CAVE, and HMD systems. For questions about pricing, content, or technical considerations, please contact Mechdyne or IDIA Lab.
